Introduction

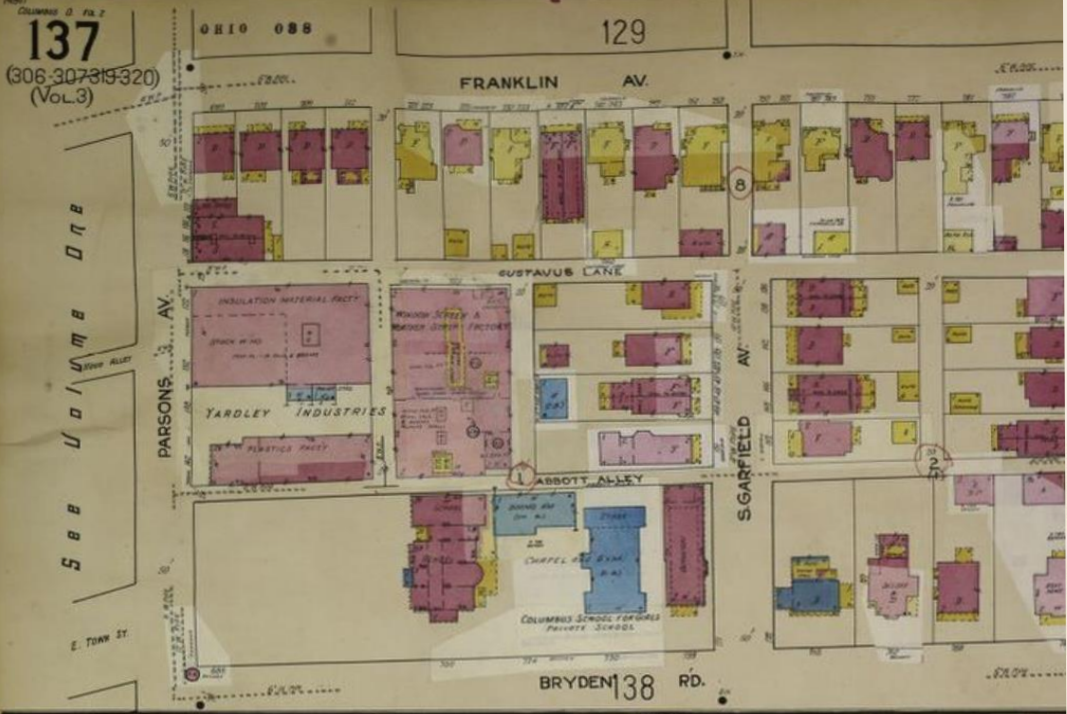

Sanborn Fire Insurance maps

- Building level maps
- Columbus: 1887, 1891, 1901, 1921-1922, 1940, 1951, 1961

Availability

- OSU Library – print and microfilm
- Ohio Public Library Information Network – B&W only
- Library of Congress – *full color high resolution scans*

KEY

	Fire proof construction. (OR FIRE RESISTIVE CONSTRUCTION)
	Adobe building.
	Stone building.
	Concrete, lime sand or cement brick.
	Concrete or reinforced concrete confin.
	Tile building.
	Brick building with frame cornice.
	" " " " stone front.
	" " " " frame side (CORNICE OR FRAME PARTITION)
	Brick veneered building.
	" " and frame building.
	Frame building, brick lined.
	" " metal clad.
	Frame building.
	Iron building.
	Tenant building occupied by various manufacturing or occupancies.
	Frame building covered with asbestos.
	Brick building with brick or metal cornice.

REFERENCE.

SPECIAL HAZARDS.

NAMES of Manufactories, &c., are written on buildings, when there is sufficient space, and their construction classified by the same marks as on Dwellings. Other Specially Hazardous Risks are COLORED GREEN, the varying number of dots (brick) and crosses (frame) showing the comparative danger from fire by occupancy.

NOTE—In classifying a building as a Special, its CONSTRUCTION is indicated, necessitating a series of letters, as follows:

BRICK	FRAME
A Construction = to 1st class Warehouse.	G Construction = to 1st class Store or Dwelling.
B " " " " 2nd " " " "	H " " " " 2nd class Store or Dwelling.
C " " " " 3rd " " " "	
D " " " " 1st " " " " Store or Dwelling.	
E " " " " 2nd " " " "	
F " " " " 3rd " " " "	

Brick Frame

Bakeries (ovens in building). Breweries. Cooperages. Drug stores (retail, with privilege of compounding). Dyeing establishments. Fur dressers. Glass stainers. Hat finishers. Hay (open stock, loose). Lamp sellers (privilege for kerosene &c.) Laundries. Malt houses. Manufactories of Baskets, Bonnet-frames, Boots and shoes, Caps, Clothing, Combs, Envelopes, Feather dusters, Fringe &c., Gas fixtures, Gold pens, Hats, Hens, Jewelry cases, Morocco, Paper bags, Pocket-books, Rattling and ruckes, Segars, Shirts, Tobacco, Umbrellas, Vinegar, Watches, Watch cases, Writing ink. Map mounting and varnishing. Metal mills. Molasses houses. Photographers. Private stables. Smoke-houses. Tanneries. Tin shops. Wheelwrights. Wire workers. Wool-pullers.

Brick Frame

Bleaching works. Book-binders. Brass and iron foundries. Coppermiths. Cotton presses. Pulling mills. Junk shops. Letter-press printers. Lithographers. Livery and Cartmen's stables. Machine shops. Manufactories of Agricultural implements. Artificial flowers, Brooms, Brushes, Carriages, Cedar-ware, Floor-cloth, Grates, Guns, Hoop-shirts, Jewelry, Lamps, Musical instruments, Oil-cloths, Paper boxes, Paper collars, Paper patterns, Patent Medicines, Plated ware, Rope and cordage, Saws, Silverware, Starch, Stoves, Tin cans, Upholstery. Oil stores (petroleum and products). Print works. Rag stores. Slaughter houses. Scaff mills. Type and stereotype foundries. (And generally buildings not occupied by workers of light wood).

Brick Frame

Box repairing. Cabinet-making. Carpenter's shops. Distilleries. Flax mills. Flour or Grist mills. Japanesers. Lard refineries. Manufactories of Artificial hair, Gaggling, Candles, Chairs, Cloaks, Confectiory, India-rubber or gutta-percha, Ivory or lamp-black, Looking-glass and Picture frames, Oiled clothing, Organs, Paper-hangings, Perfumery, Pianos, Soap, Trunks. Oil mills. Paper mills. Rectifying establishments. Sugar refineries. Tallow-melting or chandleries. Wholesale druggists (with compounding). Wollen mills. (And generally risks where much heat or light wood is used).

Brick Frame

Chemical laboratories. Coffee and Spice mills. Drug mills. Fireworks on sale. Match factories. Oil-boiling houses. Planing and Moulding mills. Printing-ink factories. Sash, blind and door factories. Saw mills. Tar-boiling houses. Turpentine distilleries. Varnish making. Window-shade factories.

DWELLINGS.

Framed air shafts are shown but colored over. Brick air shafts are left white.

CLASSIFICATION OF BUILDINGS

Shown by varying number of dots or circles. Classed by New York Board of Fire Underwriters as follows:

BRICK	FRAME
1st Class (.) Slate or metal roof, coped walls.	1st Class (.) Slate or metal roof.
2nd " (..) " " " " walls not coped.	2nd " (..) Shingle roof.
3rd " (...) Shingle roof.	

Frame Buildings with BRICK FRONTS.

Height of Buildings, in Stories and feet (74 ft. 6 in. and over).

Fronts of marble or other stone.

Iron Fronts.

"Dotted line." Interior brick wall, omitted on one or more floors.

Superior construction. (Built of non-inflammable material "throughout," except flooring and trim).

Communications protected by single fire-proof doors. (With designation "double" " " of floors).

Openings exposing Buildings.

Elevators with steam or other power. (Where enclosed with Brick or Fire-proof material a heavy line is drawn around them).

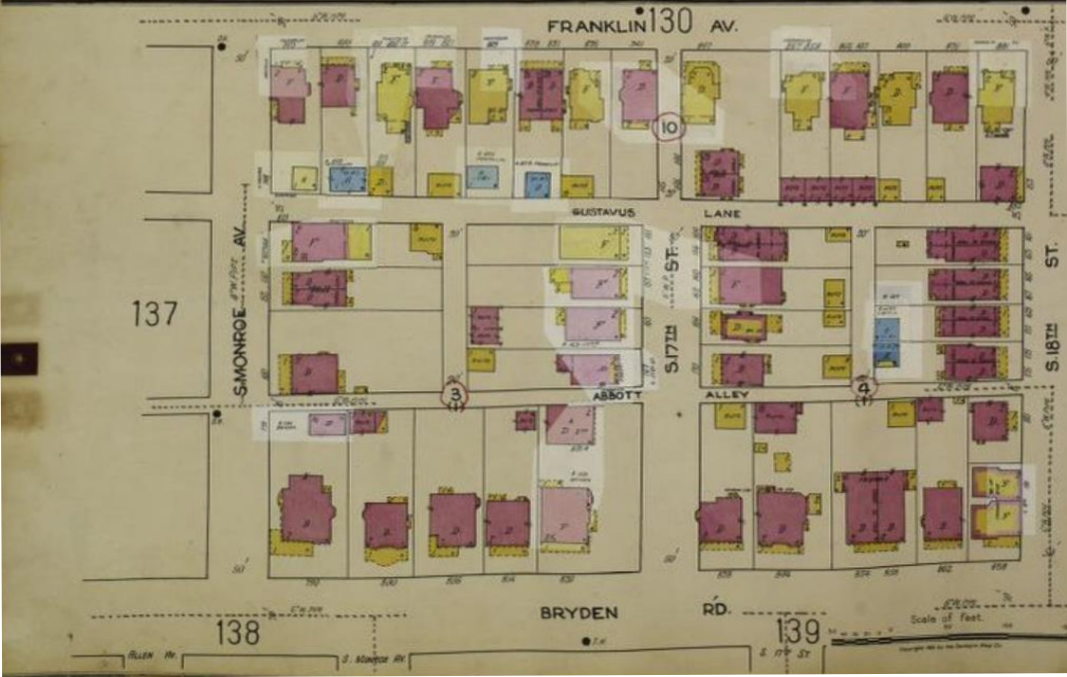

Hatchways or "Dumb-waiters."

Skylights in Roof only.

" " over opening in floor.

Smoke-houses. Retorts, and Ovens.

Mansard Roofs. Corrugated Iron. Steam-boilers.

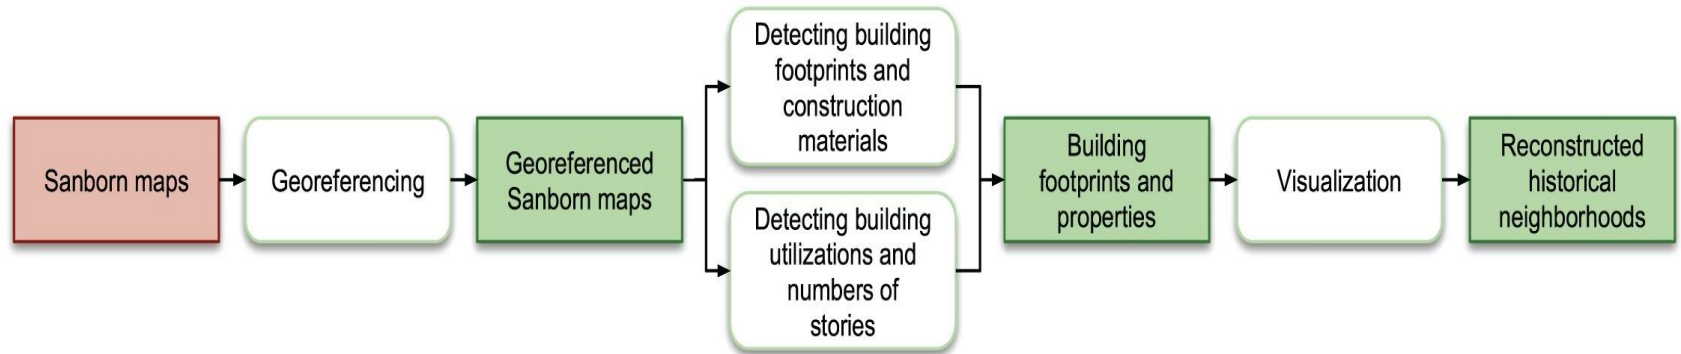

Ghost Neighborhoods project

Objectives

- Reconstruct historical neighborhoods damaged by highways, redlining, urban renewal
 - Historical Sanborn Fire Atlas data
 - Machine learning, GIS + 3D urban modeling
 - Columbus, and beyond
- High resolution digital reconstructions
 - **Parcels, buildings** – footprint, floors, construction material, usage
- Products
 - 3D urban model (LOD 3+: detailed, accurate external detail)
 - Realistic/immersive visualizations
 - Built environment measurements and analytics

Methods: General workflow

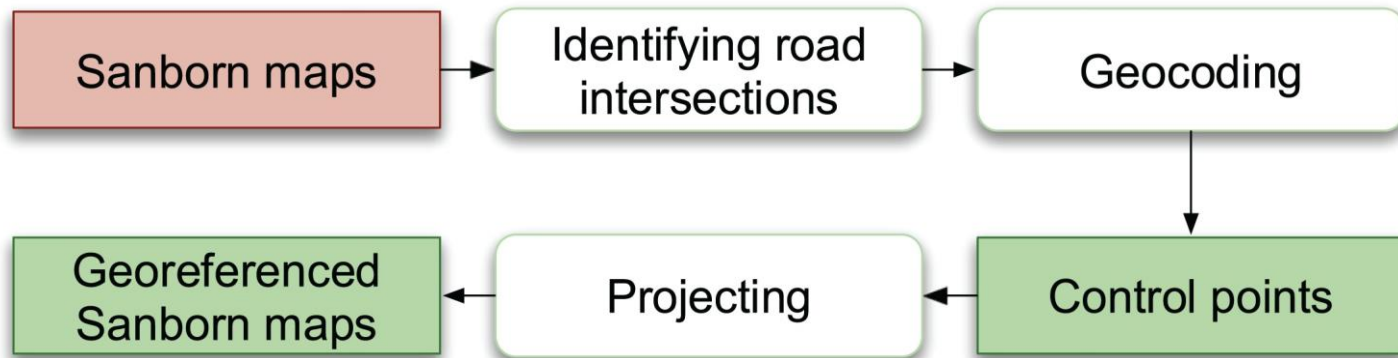

Orange-pink rectangle: input data

Open rounded rectangle: operation

Green rectangle: Intermediate or final output.

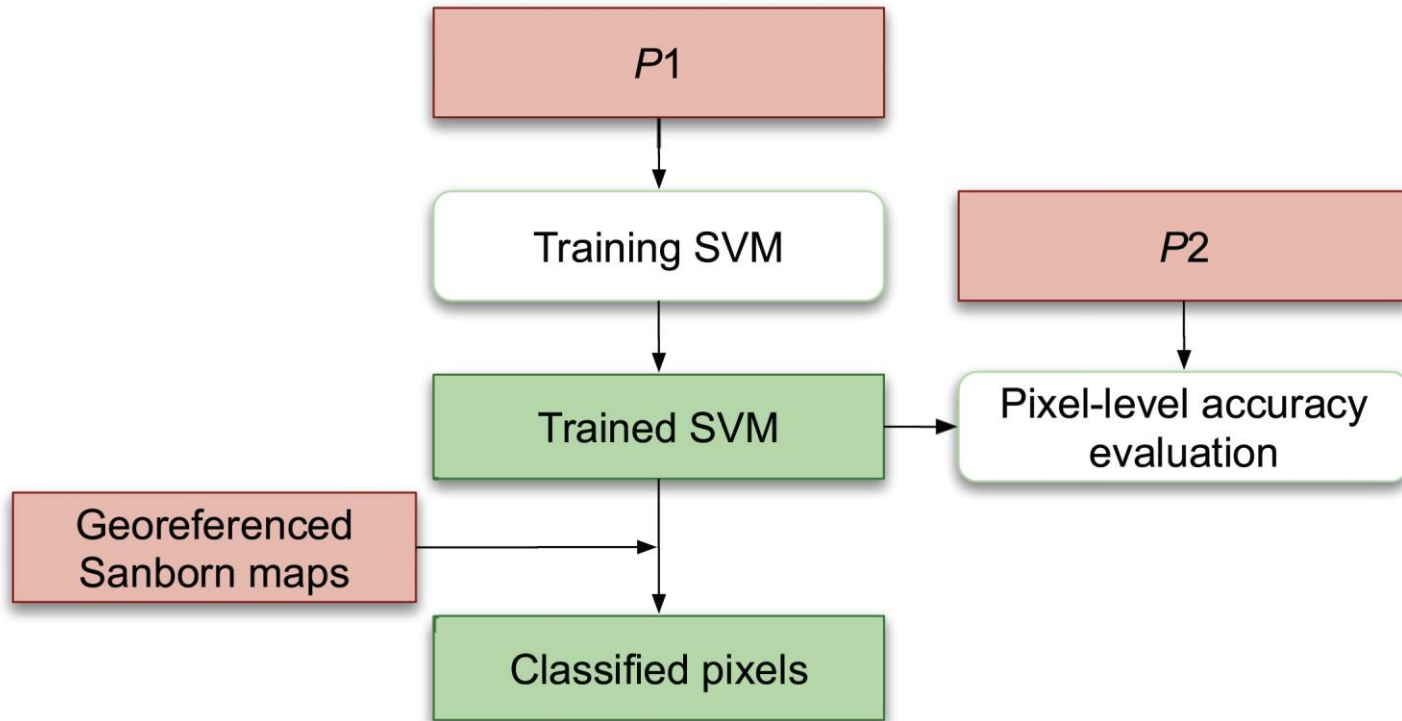

Methods: Georeferencing

Orange-pink rectangle: input data
Open rounded rectangle: operation
Green rectangle: Intermediate or final output.

Methods: Pixel-based classification

Orange-pink rectangle: input data

Open rounded rectangle: operation

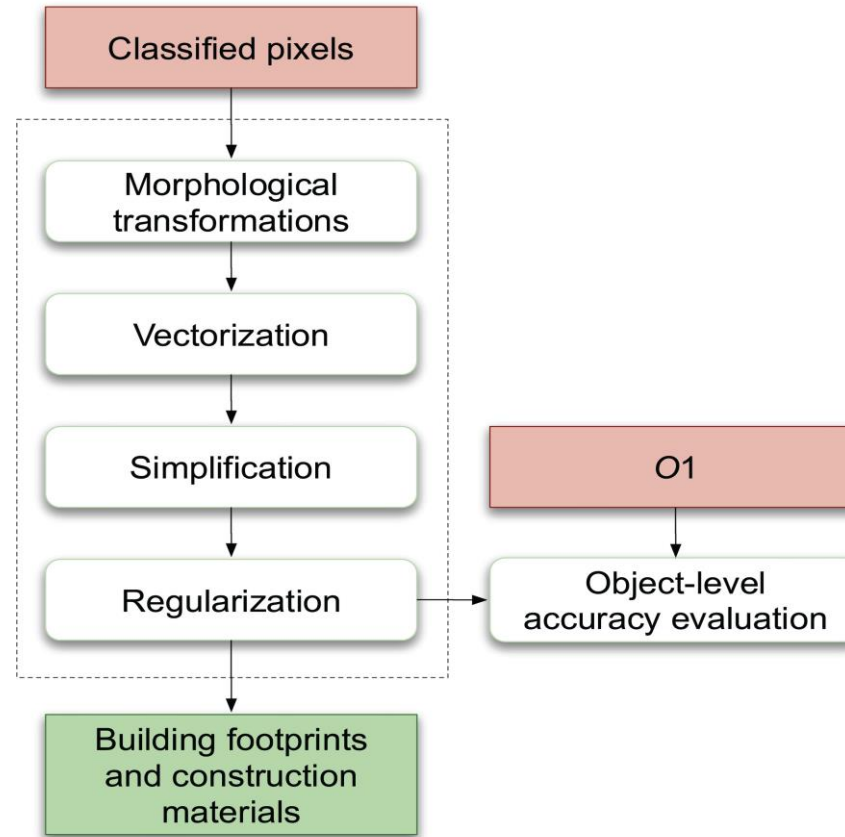

Green rectangle: Intermediate or final output

P1: Training data

P2: Evaluation data

Methods: Post-processing

Orange-pink rectangle: input data

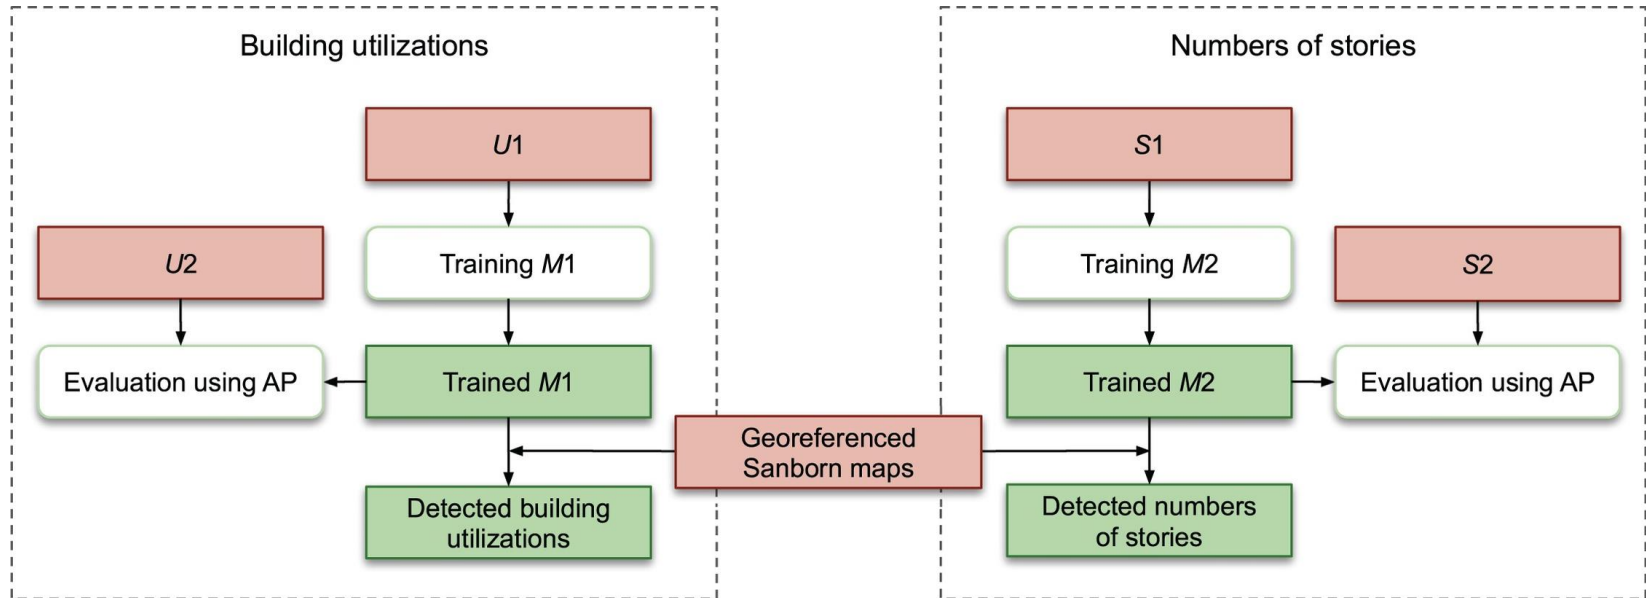

Open rounded rectangle: operation

Green rectangle: Intermediate or final output

O1: Manually identified buildings

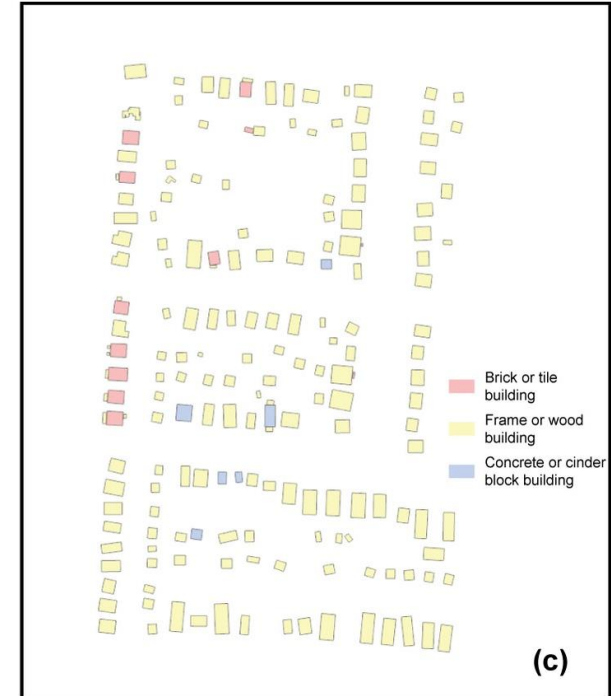

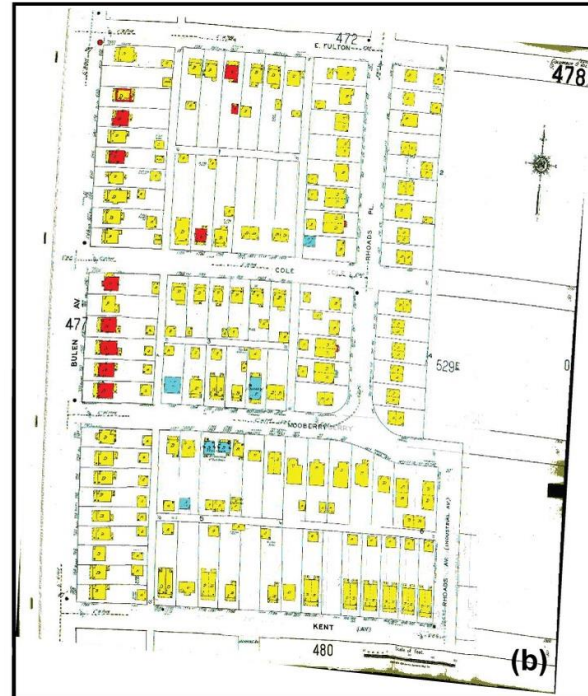

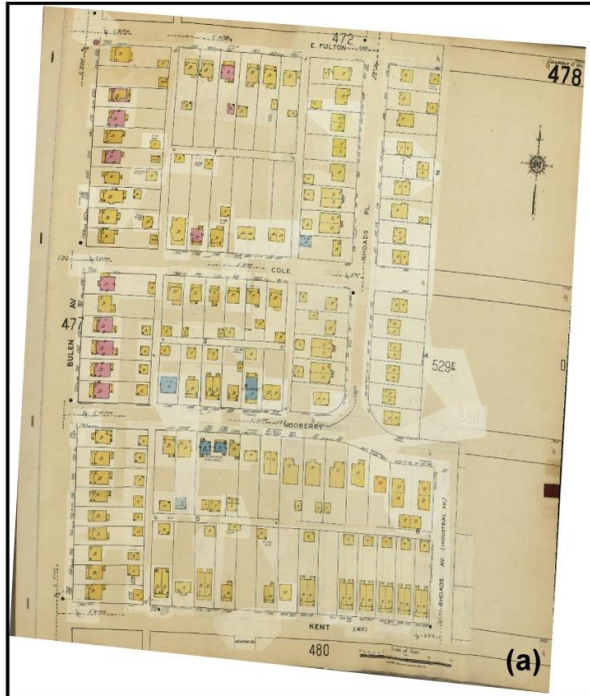

Methods: Building use and number of stories

- Orange-pink rectangle:** input data
- Open rounded rectangle:** operation
- Green rectangle:** Intermediate or final output
- $U1, S2$: Training data
- $U2, S2$: Evaluation data

Results

Detected building footprints and construction materials on a georeferenced Sanborn map

(a) georeferenced Sanborn map, (b) pixel-based classification (c) vector building objects after post-processing.

Results

Detected building utilizations and numbers of stories

White text indicates confidence scores

Version 1:
Abstract buildings

Version 2:
Realistic buildings

Version 3:
Accurate buildings

Accurate buildings

Enhancements

- Accurate textures
- Building heights
- Data
 - Ground-level imagery – historic and current
 - Architectural designs (when available)
 - Newspapers, advertisements (commercial buildings)
 - Books, art

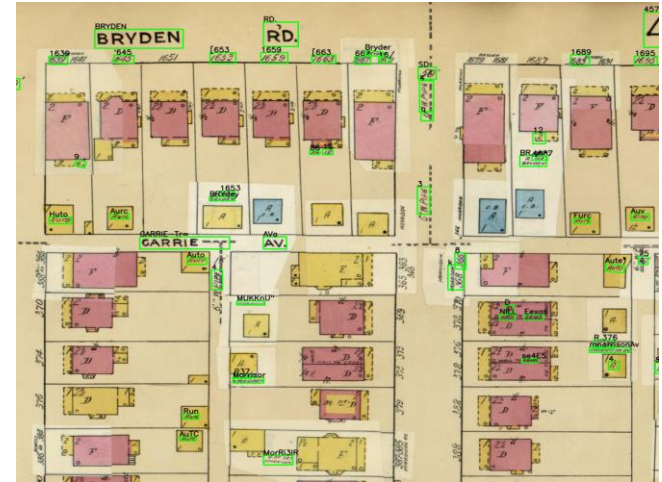

Continuing work

Other improvements

- Street addresses
- Building descriptions
- Missing streets
- Landscapes surrounding the buildings

Current study sites

- Hanford Village in 1961
- Poindexter Village in 1940
- Mt Vernon Ave in 1951
- Flytown in 1921

Orthophoto of near east side,
Columbus, 1955 (Source: Ohio
Department of Transportation)

How highways destroyed Black neighborhoods in the '60s, as told by elders who were there

Residents of Hanford Village and King-Lincoln/Bronzeville experienced the destruction of their neighborhoods due to the construction of freeways.

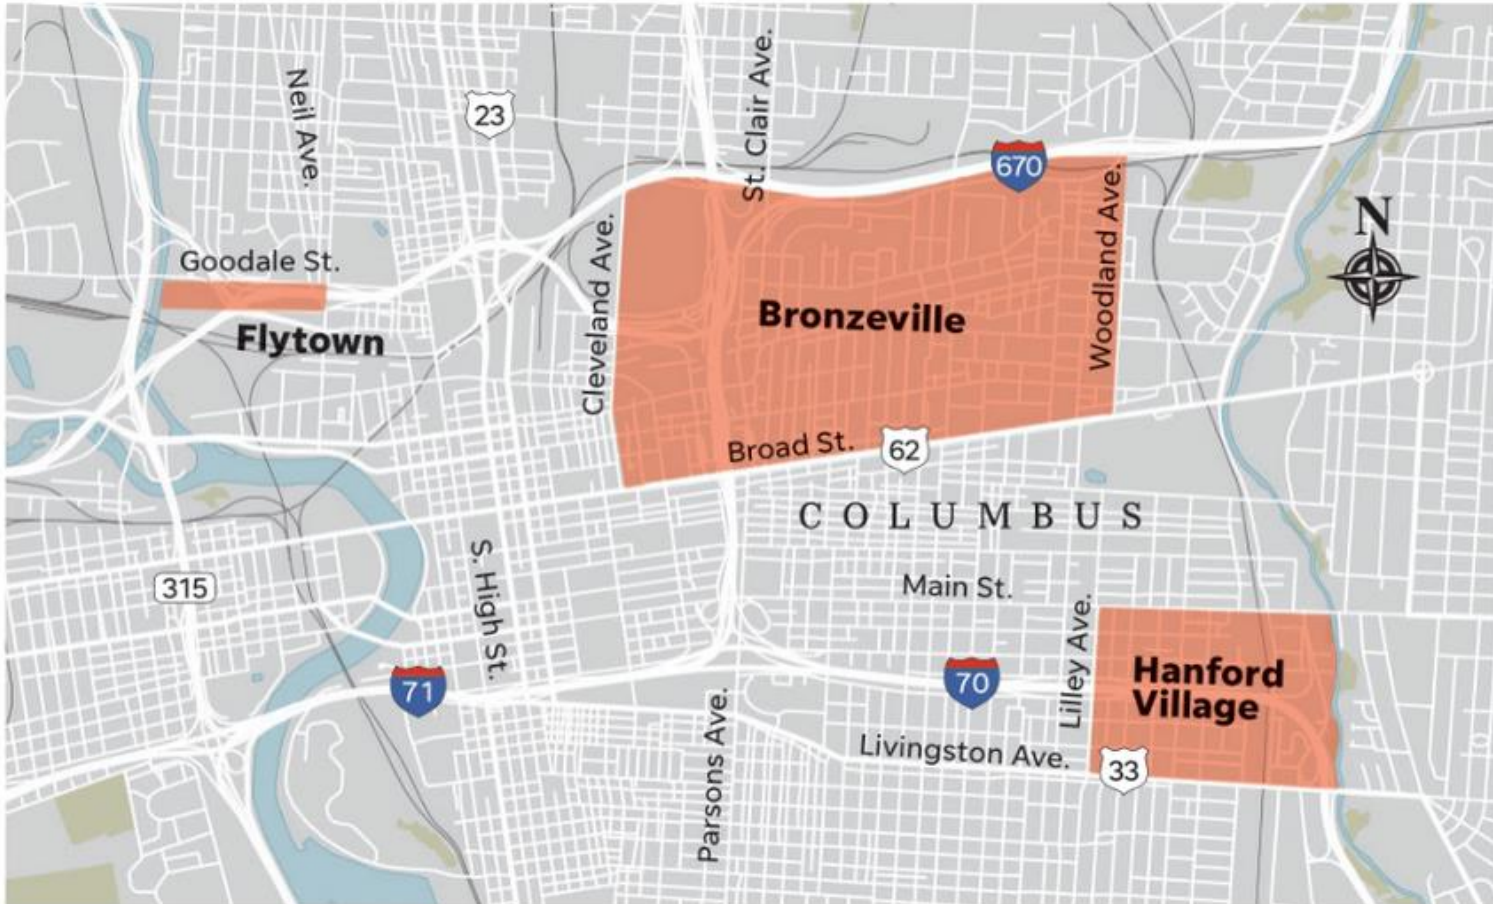

Erica Thompson, The Columbus Dispatch

Published 6:00 AM EST Dec. 3, 2020 | Updated 6:00 AM EST Dec. 3, 2020

Born in 1949 in Hanford Village, an African American neighborhood on the Near East Side, Shirley Mixon had a childhood right out of a book about 1950s suburbia.

Neighborhoods ripped apart

The construction of interstate highways frequently divided predominantly Black neighborhoods, including Hanford Village, Bronzeville and Flytown — shown here with their approximate original boundaries.

Archives and interviews

Other data

- Business permits
- Street imagery
- Historical documents
- National Historic GIS
- Stories, memories from residents

Platform: Story Maps

One of the outstanding business enterprises in Hanford is Bolender's Food Market, located on Bowman Avenue.

The lovely home of Fred Clay, present Hanford mayor, is shown here. Mr. Clay was also mayor from 1937 to 1939.

Shirley Mixon, 71, grew up in the predominantly Black neighborhood Hanford Village and saw it divided by the construction of I-70 in the 1960s.

DORAL CHENOWETH, THE COLUMBUS DISPATCH

A wedding day photograph of Ann and Linwood Walker, who had a home together on Jefferson Avenue, which was later razed.

FAMILY PHOTOGRAPH

Future directions

Future opportunities

- Other highway corridors
- Historic weather events
- 3D GIS of historic Columbus (entire city)
- Other cities & towns (Sanborn: 10K towns)

Research questions

- Loss of wealth-generating activities
- Environmental justice – e.g., urban heat island, hidden environmental hazards
- Historic urban landscapes, building inventories

The Great Flood of 1913

Ghost Neighborhoods

- Leverage historic map data with AI and GIS
- Digitally recreate neighborhoods damaged by redlining, urban renewal and urban highways
- Engagement, understanding and repair
- Create scientific database of historic built environments
