Public policy framework

for a 21st century trucking industry

1. **Develop an Industry-Wide Approach to Worker Advancement and Stability**

- Create a Trucking Innovation & Jobs Council to develop good career pathways, support worker transitions

2. **Ensure Strong Labor Standards and Worker Protections**

- Address independent contractor misclassification & wage theft
- Strengthen workers' right to organize

3. **Promote Innovation that Achieves Social, Economic and Environmental Goals**

- Support human-drone platooning, clean electric trucks
- Allow state & local experimentation with new policy responses

Alternative adoption scenario with proactive public policy
